

EyeCare America Letters from Grateful Patients

**By age 65, one in three Americans has some form of vision impairing eye disease.
Eighty percent of all blindness is preventable or curable.**

“I cannot say enough good things about this program! I had a cataract removed, insert implanted and new glasses...and, it was all like a walk in the park, with very little expense out-of-pocket. I live on a limited income. This was a godsend! My doctor’s office is only one and a half blocks from my house. I am still under the ophthalmologist’s care for another cataract. At age 75, I’m just great!!!”

*Thank you,
Dottie Domanick
Brookhaven, MS*

“I very much apologize for not writing sooner. My new eyesight is a miracle, a gift from heaven! If it was not for EyeCare America, I probably would have never been able to have this surgery. I was diagnosed with a cataract 13 years ago and had become completely blind in my right eye. They will remove my left cataract this summer. My surgery was November 4th, 2002. Again, I am so grateful to all that made this possible.”

*Sincerely,
Sarah Polsfuss
Birmingham, AL*
